Art Unit: 2664

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,8,11 and 18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,4,11,14 of U.S. Patent No. 6,697,340. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is obvious to one skilled in the art to replace a service platform with a communication system since they perform the similar functions. The following is the comparison between the claims in the instant application and the claims in the patent. A processing system --- for routing information is the same as a signaling processor --- for routing. A communication system ---processing system is the same as a service platform --- the communications include the identifier of claims 1 and 4. Same comparison is also applied to claims 11 and 18 with claims 11 and 14.

3. Claims 1,3,9,11,13 and 19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,5,8,10,14,17,19,23,26,28,32 and 35 of U.S. Patent No. 6,665,294. Although the conflicting claims are not identical, they are not patentably distinct from each other because replacing the user communication with narrowband communication signal and signaling with SS7 or Q.931 would have been obvious to one skilled in the art. The following is the comparison between the claims in the instant application with the claims in the patent. A processing system --- packet routing information recited in claims 1 and 11 is the same as a second signal component ---a signaling message recited in claims 1,10,19,28; a communication system --- the processing system recited in claims 1 and 11 is the same wherein ---the telecommunication signal recited in claims 1,10,19 and 28. The limitation in claim 3,13 is the same as in claims 5,14,23,32. The limitation in claims 9 and 19 is the same as claims 8,17,26,35.

**NOTE :** Similar rejection on the ground of nonstatutory obviousness-type double patenting is applied to Patent #s 6,631,133; 6,473,429 and 6,178,170. Please include the Patent #s 6,631,133; 6,473,429 and 6,178,170 in addition to the rejection made above in the terminal disclaimer.
